

DIY PHONE STAND

THINGS YOU NEED

Roughly 12cm by 15cm cardboard or plastic rectangle

Sharp scissors

Parent supervision/help

1

FOLD IN HALF

Fold the longer side in half, get parents to run the scissors down the middle if it isn't fully folding.

2

CUT A CURVED L SHAPE

Parents may need to do this part! You want the flattest side to be the bottom of your stand.

3

TEST IT OUT

see if it holds your phone! You might need to work on the fold a little if it isn't holding it
